Objects identified: ['tote bag, canvas']

Image Generation Prompt: tote bag, canvas, embroidered with colorful flowers and bees

Steps: ``html **Gather Materials:** One plain canvas tote bag. Embroidery floss in various colors (pink, yellow, green, blue, black). Embroidery needle. Embroidery hoop (optional, but recommended for easier stitching). **Design Transfer:** Sketch or print a design of bees and flowers onto paper. Using tracing paper or a lightbox, transfer the design onto the canvas tote bag. **Embroidery:** Secure the canvas in the embroidery hoop (if using). Following the transferred design, carefully embroider the bees and flowers using the chosen embroidery floss colors and stitches. Use back stitch or satin stitch for outlines and fill stitches for petals and bee bodies. **Finishing:** Once the embroidery is complete, carefully remove the tote bag from the hoop. Knot and secure all loose embroidery threads on the back of the tote bag. Wash the tote bag gently to remove any excess embroidery floss fibers. Air dry. ``
