Objects identified: ['water bottle, plastic', 'label, paper', 'water, liquid', 'cap, plastic']

Image Generation Prompt: Chandelier made of recycled plastic water bottles, glowing blue, modern living room

Steps: `'''html` **Clean and prepare the plastic water bottles:** Remove labels and any residue. **Cut the plastic bottles:** Cut the bottles into various sizes and shapes to create layers for the chandelier.

Assemble the layers: Arrange the cut plastic bottle pieces to form a tiered structure. Securely fasten them together using strong adhesive or other suitable methods. **Attach the cap:** Use the plastic caps to connect the bottom layers and possibly to add detail or structure. **Install lighting:** Integrate an appropriate light source within the structure. Consider using LED lights for energy efficiency. **Add a hanging mechanism:** Attach a chain or other suitable hanging fixture to the top layer. **Optional: Add paper embellishments:** Cut and shape the paper labels into decorative elements, if desired, and integrate into the design. `'''`
