Image Generation Prompt: Plastic bottle chandelier, modern, elegant, upcycled

Steps: ```html Upcycled Chandelier Instructions: **Cut and shape:** Cut the plastic water bottles to create uniform shapes for the chandelier tiers. The top tier will require a different cut to accommodate light bulbs. **Assemble the tiers:** Arrange the cut bottles in rows to form tiers of decreasing size for a tiered effect. Secure each tier with strong adhesive or wire. **Add bottle caps:** Use the plastic bottle caps as decorative accents between tiers, gluing them around the circumference of each tier. Consider painting them a metallic color for a more polished look. **Attach lights:** Carefully insert LED or small light bulbs into the modified top tier water bottles. **Create the frame:** Construct a frame from wire or metal rods to support the tiers, ensuring a stable and visually appealing structure. This frame will hold the tiers and allow for hanging. **Attach paper labels:** Cut the paper labels into strips and use these to decorate the plastic bottles for a customized design. **Hang and illuminate:** Once complete, suspend the chandelier from the ceiling and enjoy your upcycled masterpiece! **Materials:** Plastic water bottles Plastic bottle caps Paper labels Strong adhesive/wire LED lights Metal rods/wire for the frame ```
