**Objects identified:** ['plastic water bottle', 'plastic bottle cap', 'paper label', 'water']

**Image Generation Prompt:** Chandelier made of plastic water bottles, glowing blue

**Steps:** `'''html` **Clean and prepare the plastic water bottles:** Thoroughly wash and dry the plastic water bottles to remove any labels and residue. **Cut and shape the bottles:** Carefully cut the bottles to create the desired shapes for the chandelier components. This might involve removing the bottom sections and creating uniform heights. **Assemble the bottle components:** Connect the cut and shaped bottle sections together using a strong adhesive suitable for plastic. Create the desired chandelier structure, potentially using additional metallic supports or wire. **Integrate lighting:** Install small LED lights inside the prepared bottle sections. Ensure proper wiring and secure connections to a power source. **Add decorative elements (optional):** Apply decorative paper labels or paint to enhance the aesthetic appeal. Consider using the plastic bottle caps as decorative accents. **Final assembly and installation:** Secure all components and install the completed upcycled chandelier in the desired location, ensuring safe and stable hanging. `'''`
