Objects identified: ['tote bag, canvas']
Image Generation Prompt: Canvas tote bag, minimalist design, blooming flowers
Steps: ```html **Gather materials:** A plain canvas tote bag and waste materials suitable for creating a floral design (e.g., fabric scraps, plastic bottle caps, etc.). **Design the floral pattern:** Sketch a floral bouquet design on paper, considering the size and shape of the tote bag. Alternatively, print a floral design onto transfer paper. **Prepare waste materials:** Cut, shape, or otherwise modify your waste materials to create individual floral elements (petals, leaves, stems) according to your design.
Assemble the design: Arrange the waste material elements onto the tote bag to mimic your floral design. Secure them using fabric glue or stitching. **Finishing touches:** Once the design is secure, consider adding embellishments or sealant to protect the artwork and make it more durable. ```
